

## NOTE ON AN ISOPOD NAME.

In the Proceedings of the U. S. Nat. Museum, Vol. 42, 1912, pp. 173-174, in a paper entitled "Description of a new isopod crustacean belonging to the genus *Livoneca* from the Atlantic coast of Panama," the specific name *longistylis* was given to the species described. Since the publication of the paper, I found that Dana had previously used that name for a species of *Livoneca* from South America, which is described in U. S. Expl. Exp., Vol. 14, 1853, pp. 754-755. My species may, therefore, be named ***Livoneca tenuistylis***.
